Asia's Fastest Growing University

NAAC GRADE A+ ACCREDITED UNIVERSITY

Worksheet 5

Student Name: Aaryaman Singh **UID:**24MCA20449
Branch: MCA **Section/Group:**7/A
Semester: 1 **Date of Performance:**19/10/2024
Subject Name: Web Programming **Subject Code:**24CAP-605

Q. Implement following:

a) WAP to demonstrate dialog boxes in JavaScript.
b) WAP to demonstrate cookies in JavaScript.
c) WAP to create form to submit user records and validate data.

Objectives:

(A)

To understand the use of JavaScript dialog boxes such as alert(), confirm(), and prompt().
To learn how to interact with the user via dialog boxes and capture user input.

(B)

To understand how cookies work in a web environment and how to manage them using JavaScript.
To practice creating, reading, and deleting cookies using JavaScript's document.cookie API.

C)

To design a form for capturing user input, such as login or registration information, using HTML and JavaScript.
To implement client-side form validation, ensuring required fields, proper email format, password strength, and matching passwords during form submission.

Code for experiment/practical:

(A) WAP to demonstrate dialog boxes in JavaScript.
