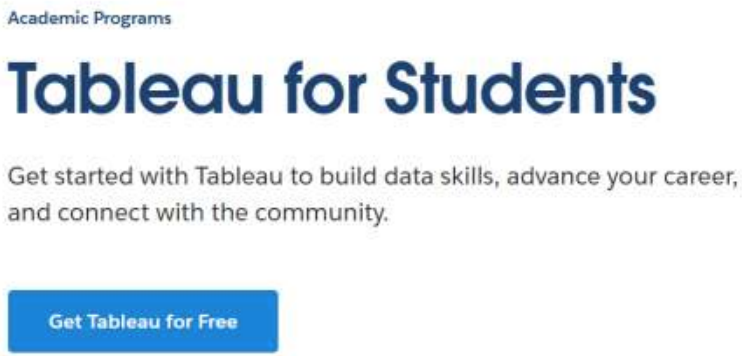
1. **Aim/Overview of the practical**: Installation of Tableau.

2. **Objective of the practical:** To learn and perform the installation of Tableau Desktop successfully.

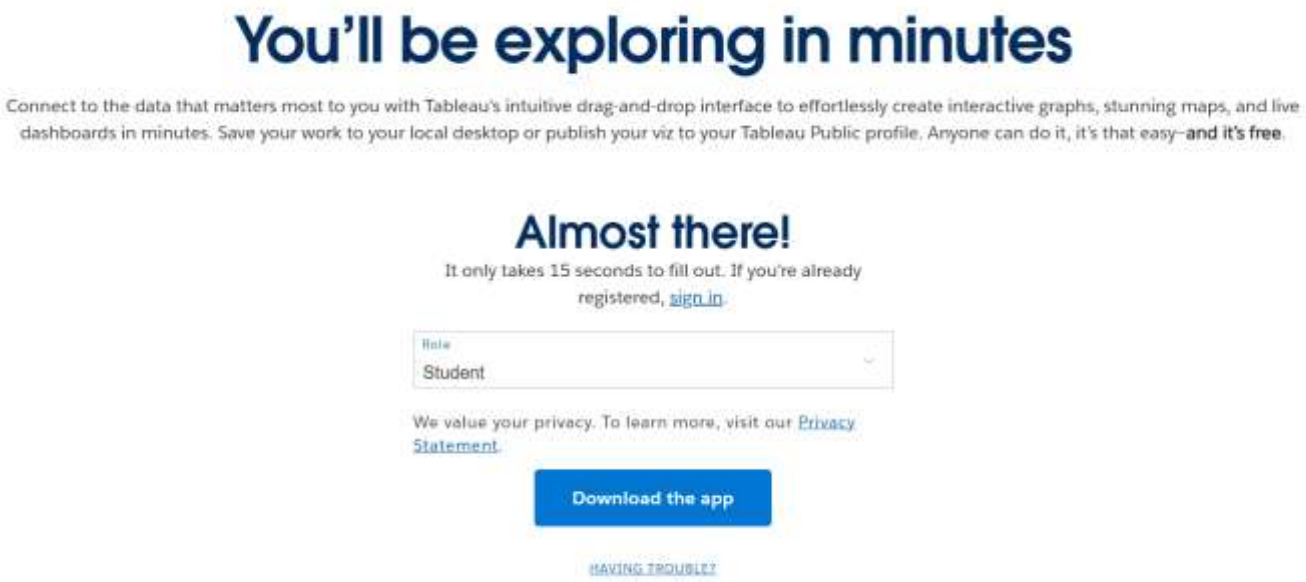
3. **Code for experiment/practical:**

   Step1: Check System Requirements Before installing Tableau, make sure your system meets the required hardware and software specifications. This ensures smooth installation and performance. You can verify these details on Tableau's official website.

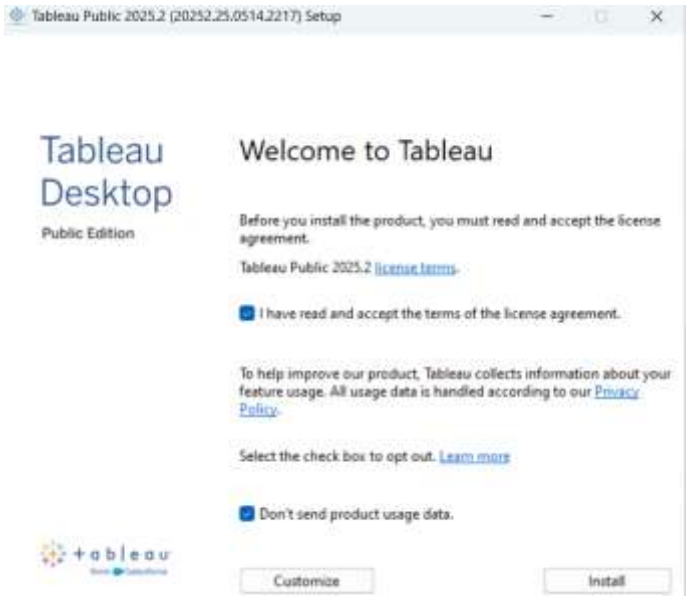
   Step 2: Download Tableau Installer
   Go to the official Tableau website: https://www.tableau.com/products/desktop/download. Sign in with your Tableau account or create a new one if you don't have it. After logging in, download the Tableau Desktop installer suitable for your operating system.



Step 3: Select the role as a Student**.**

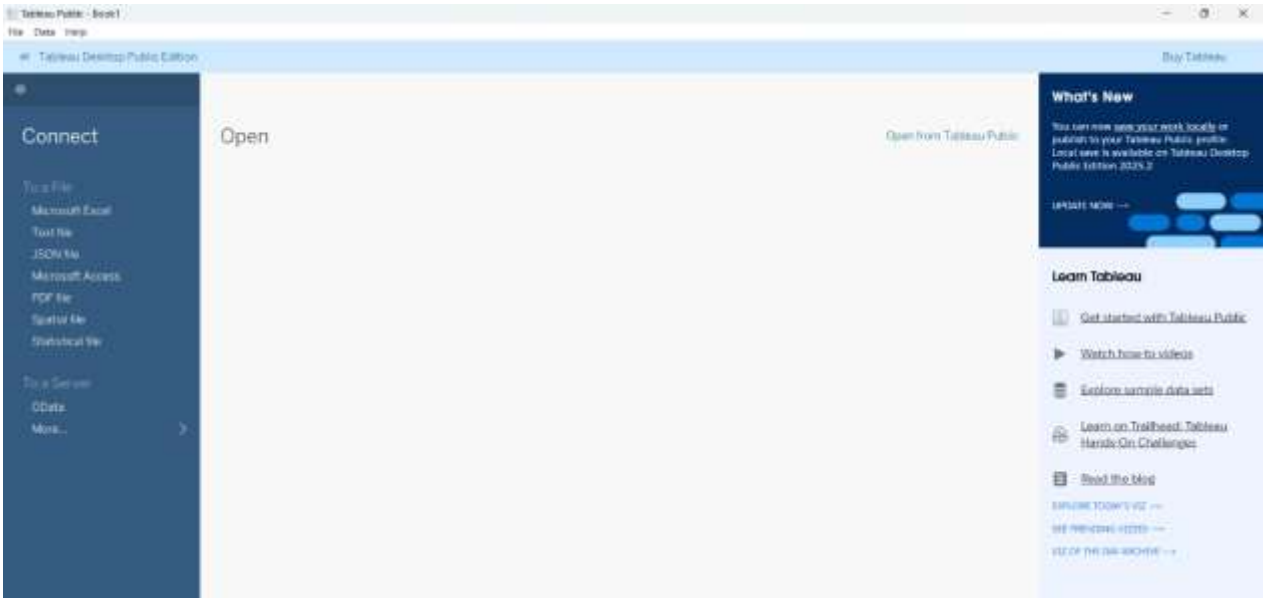


Step 4: Run the Tableau Installer Once the download is complete, run the Tableau Desktop. Once the download is complete, open the downloaded setup file and follow the on-screen instructions. The installation process will automatically begin and may take a few minutes to complete.

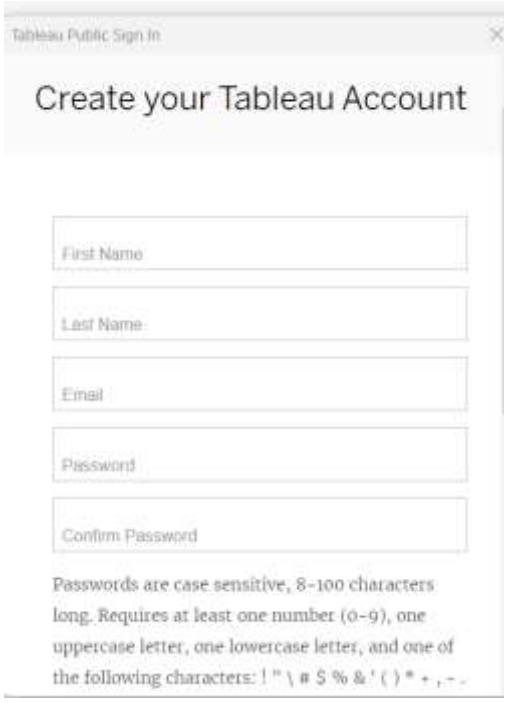


Step 5: Installation is in Progress, Wait until the installation process finishes. Avoid closing the window or interrupting the process during this stage.

Step 6: Now successfully Installed. After completion, you'll see a message confirming that Tableau Desktop has been successfully installed. You can now launch Tableau and start exploring its features.



Step 7: Create your Tableau Account.



Step 8: After creating account then it will show you some information below follow that instruction, then your tableau account is ready to go.

Learn Tableau

5. Learning Outcomes (What I have learnt):

1. Learners will understand how to check system requirements and download the Tableau installer.
2. They will be able to install and activate Tableau Desktop using a product key or trial version.
3. Learners will be ready to launch Tableau and start connecting data sources for analysis and visualization.
