1. **Aim of the practical:** Create a three-column layout similar to Facebook profile and update user's information in the page.

2. **Objective:** To create a three-column layout similar to a Facebook profile and update user information dynamically on the page.

3. **Commands/Steps:**

Index.html

```
 <!DOCTYPE html>
<html lang="en">
<head>
   <meta charset="UTF-8">
   <meta name="viewport" content="width=device-width, initial-scale=1.0">
   <title>Facebook Profile Layout</title>
   <link rel="stylesheet" href="2nd.css">
</head>
<body>
   <div class="container">
      <div class="sidebar">
         <h2>Profile</h2>
         <ul>
```

```
            <li>Friends</li>
            <li>Photos</li>
            <li>Videos</li>
            <li>Groups</li>
        </ul>
    </div>

    <div class="main-content">
        <div class="profile-header">
            <img src="pfphoto.png" alt="Profile Picture" class="profile-pic">
            <h1 id="username">Aaryaman Singh</h1>
            <button onclick="updateProfile()">Update Profile</button>
        </div>
        <div class="bio">
            <h2>About ME</h2>
            <p id="bio-text">Full Stack Developer.</p>
        </div>
    </div>

    <div class="right-sidebar">
        <h2>Suggested Friends</h2>
        <ul>
            <li>Varun Arora</li>
            <li>Prince Garg</li>
            <li>Nikhil Kumar Yadav</li>
        </ul>
    </div>
  </div>

  <script src="2nd.js"></script>
</body>
</html>
```

CSS

```
.container {
    display: flex;
    justify-content: space-between;
    padding: 20px;
}

.sidebar, .right-sidebar {
    width: 20%;
    background-color: #fff;
    padding: 20px;
    border-radius: 8px;
    box-shadow: 0 0 10px rgba(0, 0, 0, 0.1);
}

.main-content {
    width: 55%;
    background-color: #fff;
    padding: 20px;
    border-radius: 8px;
    box-shadow: 0 0 10px rgba(0, 0, 0, 0.1);
}

.profile-header {
    text-align: center;
}
```

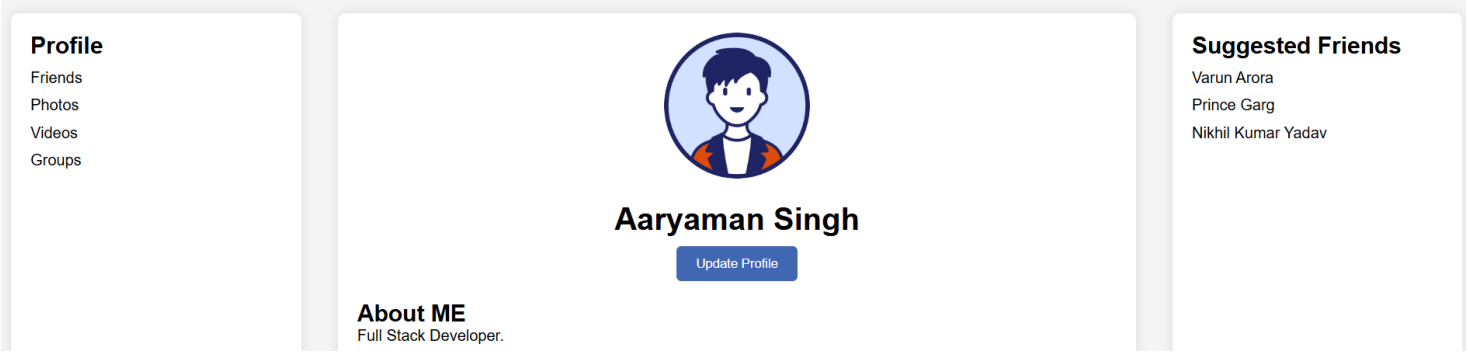
JavaScript

```
function updateProfile() {
    const username = prompt("Enter your new name:");
    const bio = prompt("Enter your bio:");

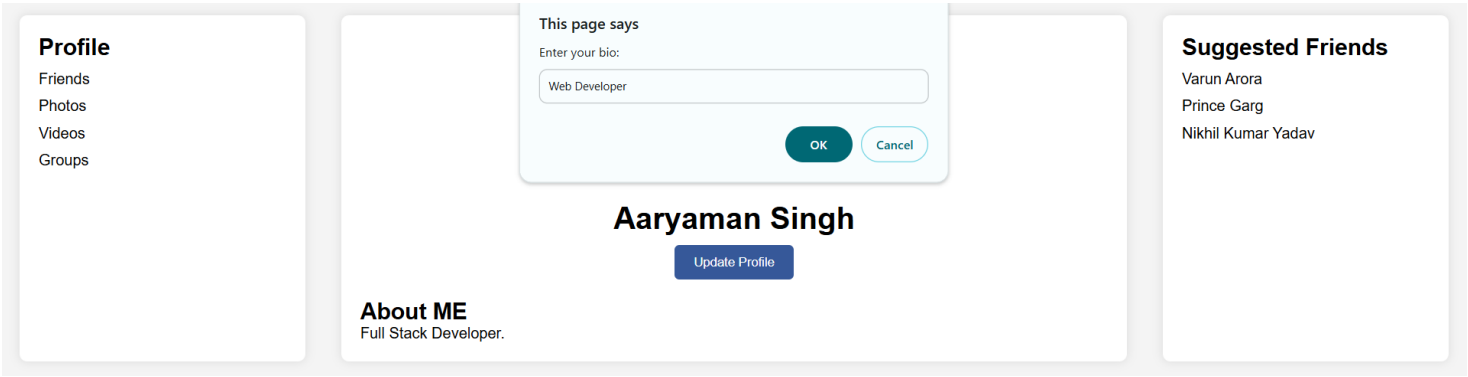
    if (username) {
        document.getElementById("username").innerText = username;
    }

    if (bio) {
        document.getElementById("bio-text").innerText = bio;
    }
}
```

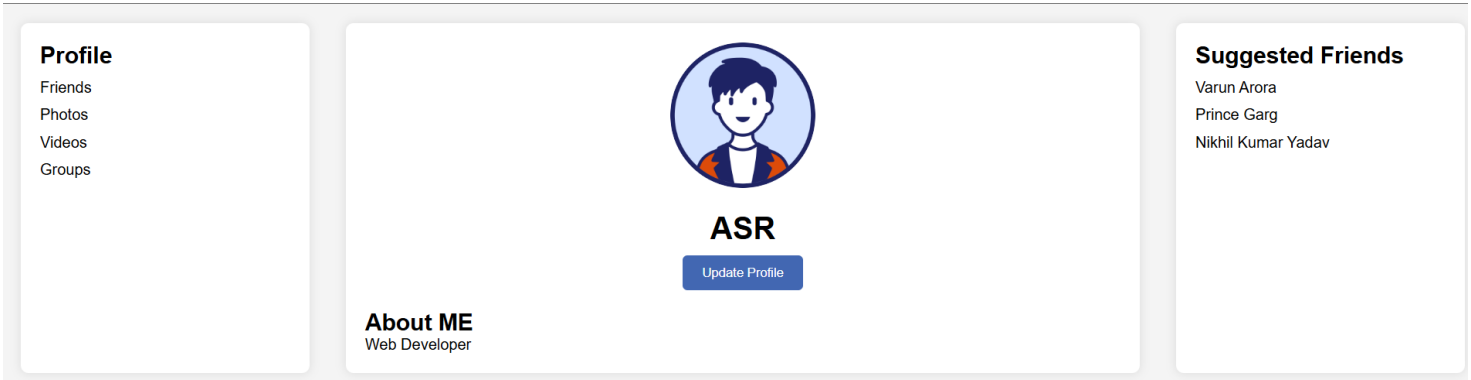
4. Result:



Updating a Profile



Updated Profile



5. Learning Outcomes (what I have learned):

- Understand how to structure a three-column layout using HTML and CSS.
- Implement dynamic user data updates using JavaScript.
- Enhance responsiveness and UI design for a better user experience.
