1.Aim of the practical: To understand and implement various logical functions in Excel including:

- IF Statement
- Nested IF
- AND, OR, NOT
- IFERROR
- SUMIF, AVERAGEIF
- COUNTIF
- AVERAGEIFS

2.Objective: To create a student report card with:

o Pass/Fail status (≥35 marks in each subject)
o Overall grade (A: ≥80%, B: ≥65%, C: ≥50%, D: otherwise)
o Scholarship eligibility (≥75% in all subjects AND ≥90% attendance)
o Count of subjects with distinction (≥75 marks)
o Average of top 3 subjects

3.Code for experiment/practical:

- =SUM(D2:G2)

Total Marks	Marks Obtained
400	337
400	205
400	359
400	135
400	236
400	321
400	282
400	376
400	245
400	269

- =J2/I2*100

24MCA20457	Mohit	66	61	72	70	7500%	400	269	67.25	Pass	B+	Not Eligible	No

Learning outcomes (What I have learnt):

- Ability to use conditional statements (if-else) to determine pass/fail status and grading criteria.
- Skills in calculating averages, percentages, and distinctions from raw subject marks.
- Understanding and applying real-world grading logic (A, B, C, D) based on percentage.
