Q1. Implement following:

A. WAP will demonstrate various HTML tags and anchor control tag.

B. WAP will demonstrate the table tag.

1. Aim/Overview of the practical:

a. WAP will demonstrate various HTML tags and anchor control tag.

b. WAP will demonstrate the table tag.

2. Task to be done:

a. Open a text editor, such as Visual Studio Code or Sublime Text, and begin writing HTML code. Start with thebasic structure, including <!DOCTYPE html>, <html> </html>, <head> </head>, and <body> </body>.

b. The use of tables in the web has become more popular recently because of the amazing HTML table tags that make it easier to create and design them. To create a table in HTML you will need to use tags. The most important one is the <table> tag which is the main container of the table. It shows where the table will begin andwhere it ends**.**

3. Algorithm/Flowchart:

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>HTML Tags, Anchor, and Table Example</title>
    <style>
        /* Global Styles */
        body {
            font-family: Arial, sans-serif;
            margin: 0;
            padding: 0;
            background-color: #f4f4f4;
            color: #333;
        }

        /* Container */
```

```
.container {
    max-width: 1200px;
    margin: auto;
    padding: 20px;
}

/* Heading Styles */
h1 {
    text-align: center;
    color: #051642;
}

h2 {
    color: #0d0552;
}

/* Paragraph Styles */
p {
    font-size: 1.1rem;
    line-height: 1.6;
}

/* List Styles */
ul, ol {
    margin: 10px 0;
    padding-left: 20px;
}

ul li, ol li {
    margin: 5px 0;
}

/* Anchor Link */
a {
    color: #0c93e1;
    text-decoration: none;
    font-weight: bold;
}

a:hover {
    text-decoration: underline;
}

/* Table Styles */
table {
    width: 100%;
    border-collapse: collapse;
    margin: 20px 0;
}

table, th, td {
    border: 1px solid #ddd;
}

th, td {
    padding: 12px;
    text-align: left;
}
```

```
        th {
            background-color: #033824;
            color: white;
        }

        /* Image */
        img {
            display: block;
            margin: 20px auto;
            max-width: 100%;
        }

        /* Box for Content */
        .content-box {
            background-color: #fff;
            padding: 20px;
            border-radius: 8px;
            box-shadow: 0 0 10px rgba(0, 0, 0, 0.1);
        }

        /* Footer */
        footer {
            text-align: center;
            margin-top: 20px;
            padding: 10px;
            background-color: #333;
            color: white;
        }
    </style>
</head>
<body>
    <div class="container">

```

4. Result/Output/Writing Summary:

Learn HTML: Tags, Anchors, and Tables

Welcome to My Webpage

This webpage demonstrates the use of **various HTML tags**, including headings, paragraphs, lists, anchor controls, and tables. It's styled with internal CSS for a polished look.

Topics Covered

- HTML Basics
- CSS Styling
- Tables and Links

1. Introduction
2. Understanding Tags
3. Adding Styles with CSS

Useful Link

Image Example

Student Marks Table

Student Name	Subject	Marks
Aaryaman	Math	90
Varun	Science	85
Prince	English	88

Learning outcomes (What I have learnt):

1.Learnt How to work with basic html .

2.Learnt how to work with anchor tag.

3.Learnt how to work with ordered and unordered list
